

Make It Up

I can solve multiplication and division problems using arrays.

Draw a line from each context to the matching array. Write a context for the array you have left over.

I have 22 sweets. I give 2 to each person in the class. How many people are in the class?

I give each of my dogs 5 bones. I have 3 dogs. How many bones do I need to buy?

I use 2 eggs in each of my cakes and bake 6 cakes. How many eggs do I need altogether?

I can see some houses. Each house has 2 chimneys and I count 24 chimneys. How many houses are there?

My context:

Make It Up

Make an array with counters or draw one (using the squares to help you) and a picture to help you work out the answer to this puzzle.

Remember to make your picture really simple!

Draw jumps on the number line to match what you have done.

? Filip has 20 stickers. He sticks 5 on each page of his book. How many pages does he fill? _____
